SHEVILLE-BUNCOMBE
TECHNICAL INSTITUTE
ESTABLISHED 1969

R. Barnes
4-23-64

DEDICATION

Our 1964 yearbook is dedicated to the Chairman of our Board of Trustees, to a member of the Community College Advisory Council of the State of North Carolina and to the Director of Management Services, American Enka Corporation. This dedication belongs to an outstanding man whom we are proud to call our friend.

Our friend has spent untold hours representing our cause; striving to encourage our development; and, as can be witnessed by our phenomenal growth, he has done an outstanding job. For his efforts in our behalf, we are indeed proud to dedicate our yearbook to Dr. Lester F. Zerfoss.

We hope that Dr. Lester Zerfoss will always continue to represent and encourage us in our development.

THE MOUNTAIN TECH

Asheville, North Carolina
June, 1964

TO OUR FRIENDS:

In the late 50's we were only a plan in someone's mind, but by September, 1961 we were an established institution with two fully equipped buildings, a ready faculty, and approximately one hundred and fifty eager students.

In the past three years we have made tremendous strides forward. We have added a third building and have plans for a fourth building on the drawing board. In each of the twelve month school terms we have doubled our enrollment and increased our faculty.

Our status has changed from an Industrial Education Center to a recognized Technical Institute.

IN MEMORY

Mr. Donald W. White

The faculty and students at the Asheville-Buncombe Technical Institute express their deep sorrow at the death on December 9, 1963 of Donald W. White, who since August, 1961 served this school as instructor and Department Head in Air Conditioning-Refrigeration and Sheet Metal.

We grieve our loss of a friend who was esteemed by his associates, loved by his students, and respected by all.

CHEMICAL TECHNOLOGY

Preparing for a rewarding career in our ever advancing field of Chemistry, a student may one day work on rocket fuel, plastics, or nuclear power. He may work on perfecting high purity chemicals, or in developing new textiles or paper products.

You Stole My Flask.

Qualitative Analysis

DATA PROCESSING TECHNOLOGY

These students are striving to understand the newest concepts in computer automation. One of them may work at Cape Kennedy's Mercury Control Center computing the arc of a satellite or in the important accounting department of giant industry.

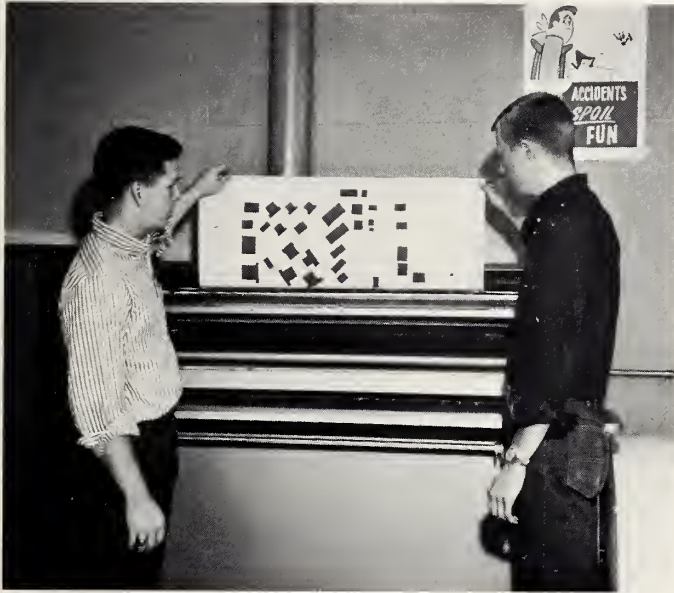

The 407 Accounting Machine

What' wrong, the 1620 Computer or the Operators?

DRAFTING AND DESIGN TECHNOLOGY

Reproducing A Blueprint.

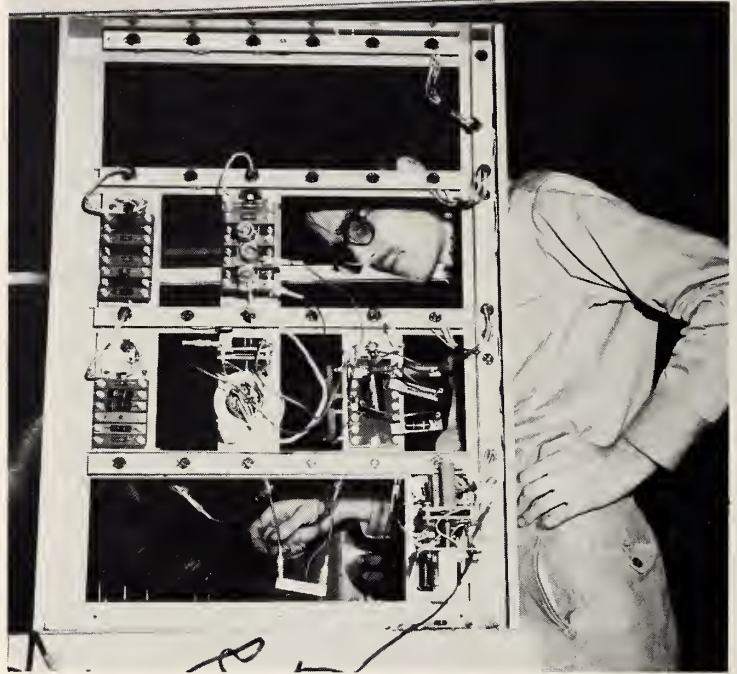

It'll Never Fly.

These men will be our future designers. You may find them in the drafting rooms of a textile or metal working industry, in an engineering consulting firm, or working on one of the many planning jobs for the city, state or federal government.

ELECTRONICS TECHNOLOGY

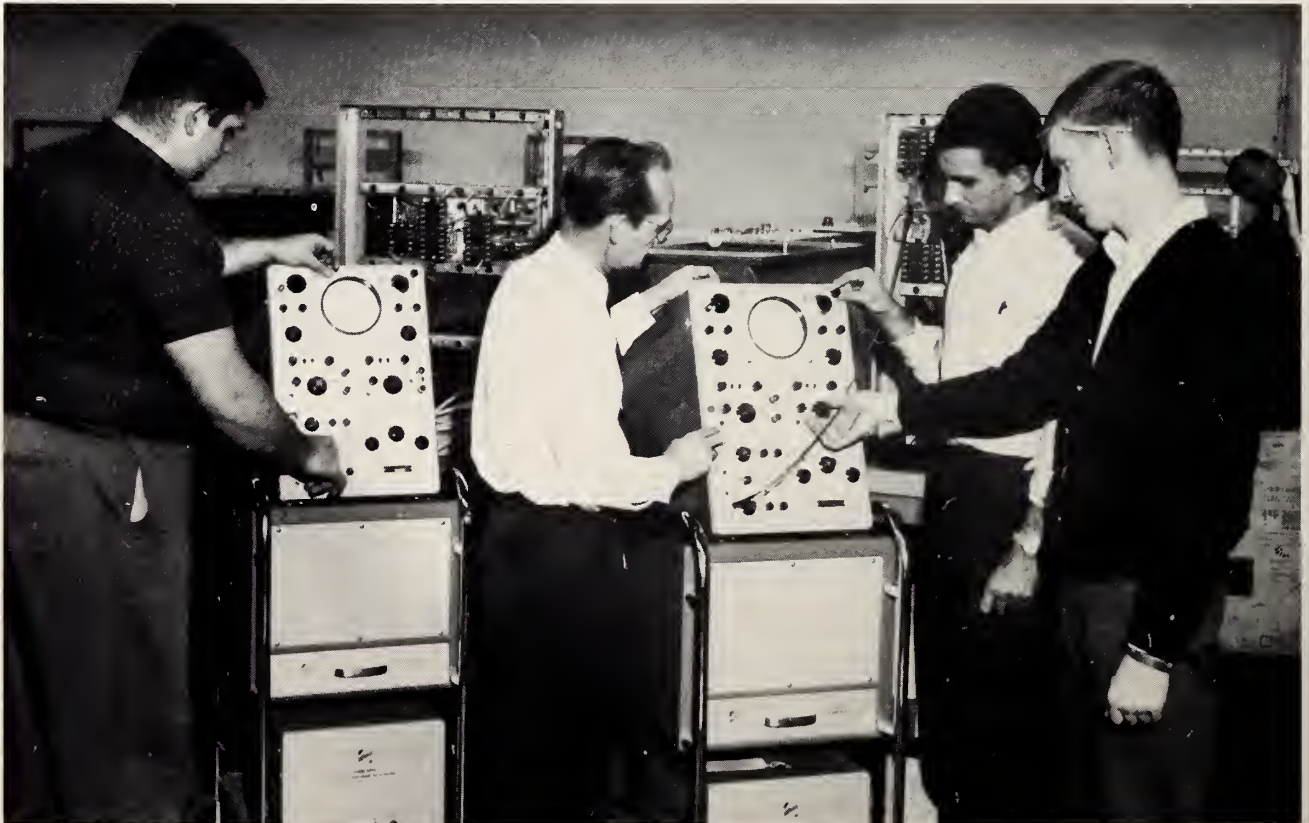

Training for an exciting career in the field of Electronics, one of these graduates might be among the first to land on the moon. He may be involved in research and development, in instrumentation, or in any one of the challenging opportunities available for the man with this complex training.

Applying Theory

Studying New Equipment

MECHANICAL TECHNOLOGY

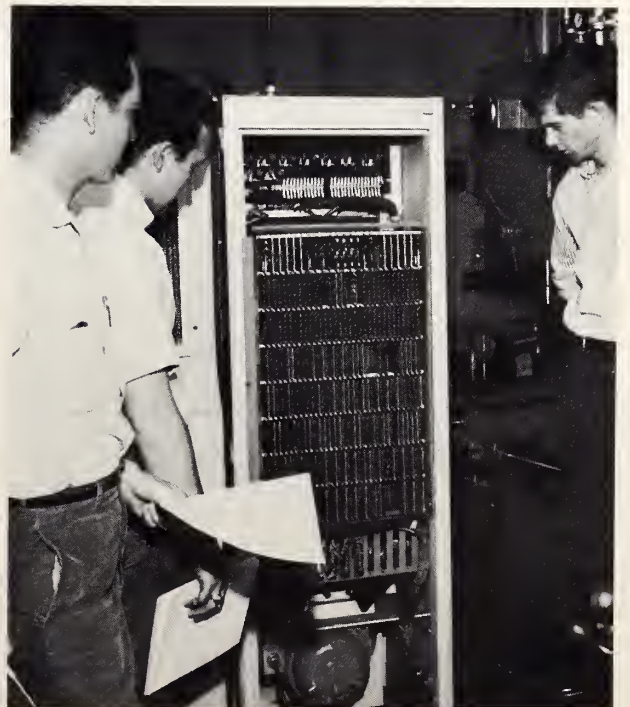

As these men learn the complex details involved in understanding modern mechanization, they are prearing to meet the responsibility of our rapidly developing automated way of life.
